Thomas F. Sturm
A Tutorial for Poster Creation with Tcolorbox

Poster Tutorial #1

Welcome to the poster tutorial!

We start at the very begin with an empty poster.

In this tutorial, we use A3 sized paper in landscape format which can be set up with the `geometry` package. Naturally, we need the `tcolorbox` package with at least the `poster` library loaded.
At begin, we only choose the number of columns (4) and rows (5) and we display a help grid.

```
\documentclass[12pt]{article}
\usepackage[a3paper,landscape]{geometry}
\usepackage[poster]{tcolorbox}
\pagestyle{empty}

\begin{document}
\begin{tcbposter}[
  coverage = {spread},
  poster   = {showframe,columns=4,rows=5},
]
% Here, we insert the poster content later
\end{tcbposter}
\end{document}
```

r1

r2

r3

LaTeX Poster

r4

r5

Poster Tutorial #2

Now, we put in some fancy settings to the poster `coverage`.
Also, some more packages are loaded for the future poster content.

```latex
\documentclass[12pt]{article}
\usepackage[a3paper,landscape]{geometry}
\usepackage{lipsum}
\usepackage{lmodern}
\usepackage{enumerate}
\usepackage[poster]{tcolorbox}
\tcbuselibrary{minted} % <- replace by \tcbuselibrary{listings}, if minted does not work for you
\pagestyle{empty}

\begin{document}
\begin{tcbposter}[
  coverage = {
      spread,
      interior style={top color=yellow,bottom color=yellow!50!red},
      watermark text={\LaTeX\ Poster},
      watermark color=yellow,
  },
  poster   = {showframe,columns=4,rows=5},
]
% Here, we insert the poster content later
\end{tcbposter}
\end{document}
```

Poster Tutorial #3

It is time to fill boxes into the `poster` environment. This is the most crucial part of your poster creation, because you have to decide about the general contents and the base design.

But, as you can see in the listing below, the boxes are placed with relative positions to each other and the sizes are able to change automatically.

```
%...
\posterbox{name=title,column=1,span=3,below=top}{
  \resizebox{18cm}{!}{\bfseries\Huge My Important Project}\\[3mm]
  Hans.Mustermann@deepthought.university
}

\posterbox[adjusted title=References]{name=references,column=2,span=1.5,above=bottom}{}

\posterbox[adjusted title=Process]{name=process,column=2,span=2,above=references}{}

\posterbox[adjusted title=Project Description]{name=project,
    sequence=1 between title and bottom then 2 between title and process}{}

\posterbox[adjusted title=Central Picture]
  {name=picture,column=3,between=title and process}{}

\posterbox[adjusted title=Core Algorithm]
  {name=algorithm,column=4,between=top and references}{}

\posterbox[adjusted title=Contact]
    {name=contact,column*=4,span=1.5,between=process and bottom}{}
%...
```

The `project` box is made breakable. Note the two parts `project1` and `project2` where the second part is denoted by a placeholder.

Project Description

Central Picture

Poster Tutorial #4

As next step, we choose some nice settings for all the boxes. These global settings are applied using the `boxes` option of the poster.

Also, we do not need the auxiliary frame lines anymore and we set `showframe=false`.

```
%...
\begin{tcbposter}[
  coverage = {
      spread,
      interior style={top color=yellow,bottom color=yellow!50!red},
      watermark text={\LaTeX\ Poster},
      watermark color=yellow,
  },
  poster   = {showframe=false,columns=4,rows=5},
  boxes    = {
      enhanced standard jigsaw,sharp corners=downhill,arc=3mm,boxrule=1mm,
      colback=white,opacityback=0.75,colframe=blue,
      title style={left color=black,right color=cyan},
      fonttitle=\bfseries\Large\scshape
  }
]
%...
```

Process

Project Description

Core Algorithm

Central Picture

Poster Tutorial #5

We make the `title` box different from the other boxes by removing everything except the background. Also, two pictures are added left and right which should be seen as logos or similar things.

```
%...
\posterbox[blankest,interior engine=path,height=3cm,
    halign=center,valign=center,fontupper=\bfseries\large,colupper=red!25!black,
    underlay={
      \node[right,inner sep=0pt,outer sep=0pt] at (frame.west) {\includegraphics[height=3cm]{pink_marble.png}};
      \node[left,inner sep=0pt,outer sep=0pt] at (frame.east) {\includegraphics[height=3cm]{crinklepaper.png}};
    },
  ]{name=title,column=1,span=3,below=top}{
  \resizebox{18cm}{!}{\bfseries\Huge My Important Project}\\[3mm]
  Hans.Mustermann@deepthought.university
}
%...
```

Process

References

Contact

My Important Project

Hans.Mustermann@deepthought.university

Project Description

Central Picture

Core Algorithm
Poster Tutorial #6

The `references` box is filled with a simple `enumerate` list.
You may insert a more fancier and LaTeXier bibliography for your real project . . .

```
%...
\posterbox[adjusted title=References]{name=references,column=2,span=1.5,above=bottom}{
  \begin{enumerate}[{[1]}]
  \item\label{litA} Important Authors, \textit{Important Title}
  \item\label{litB} More Important Authors, \textit{More Important Title}
  \item\label{litC} Less Important Authors, \textit{Less Important Title}
  \end{enumerate}
}
%...
```

Surely, you noted that all boxes adapt to the grown height of our `references` box. Maybe, you want to get some pages back to see how the box placements were done for this example.

Project Description

Poster Tutorial #7

We go on with the `process` which gets some example `tikzpicture`.

Note that you always can insert additional `tcolorbox` options like `halign=center` to a `posterbox`.

```
%...
\posterbox[adjusted title=Process,halign=center]{name=process,column=2,span=2,above=references}{
  \begin{tikzpicture}[very thick,radius=2cm]
    \begin{scope}
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=30];
    \end{scope}
    \begin{scope}[xshift=5cm]
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=70];
    \end{scope}
    \begin{scope}[xshift=10cm]
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=110];
    \end{scope}
    \begin{scope}[xshift=15cm]
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=240];
    \end{scope}
  \end{tikzpicture}
}
%...
```

Process

Vivamus quis tortor vitae risus porta vehicula.

That's all.

Process

Central Picture

Poster Tutorial #8

The `project` is a breakable box with two parts. Nevertheless, you can fill the box like any other box. The information on how to break was already given by the placement options.

```
%...
\posterbox[adjusted title=Project Description]{name=project,
    sequence=1 between title and bottom then 2 between title and process}{
  See [\ref{litA}]: \lipsum[1]
  \begin{center}
  \tikz \draw[thick,rounded corners=8pt]
    (0,0)--(0,2)--(1,3.25)--(2,2)--(2,0)--(0,2)--(2,2)--(0,0)--(2,0);
  \quad by [\ref{litB}]
  \end{center}
  \lipsum[2-3]\par
  See [\ref{litC}]:
  \lipsum[4]
  \begin{center}
  \tikz \shadedraw [left color=red,right color=blue]
  (0,0) rectangle (2,2);
  \end{center}
  That's all.
}
%...
```

The two boxes have a *closed* appearance, because we used `enhanced standard jigsaw` as global style for all boxes. For an *open* appearance, just use `enhanced jigsaw` instead:

```
%...
\begin{tcbposter}[
%...
  boxes    = {
    enhanced jigsaw,% <-----------
    sharp corners=downhill,arc=3mm,boxrule=1mm,
%...
  }
]
%...
```

Poster Tutorial #10

For the Algorithm, we need a `verbatim` environment. Here, `tcblisting` is used.
Therefore, we cannot use a `posterbox` as usual, but we can a `posterboxenv` environment instead.
Note that you would get some weird errors, if `posterbox` would have been applied.

```
%...
\begin{posterboxenv}[adjusted title=Core Algorithm,leftupper=0pt,rightupper=0pt]
   {name=algorithm,column=4,between=top and references}
\begin{tcblisting}{blankest,listing only}
\begin{tikzpicture}[very thick,radius=2cm]
  \begin{scope}
    \path[draw=black,fill=white] (0,0) circle;
    \path[fill=red] (0,0) -- (2,0)
      arc [start angle=0, end angle=30];
  \end{scope}
%...
\end{tikzpicture}
\end{tcblisting}
\end{posterboxenv}
%...
```

Core Algorithm

```
\begin{tikzpicture}[very thick,radius=2cm]
  \begin{scope}
    \path[draw=black,fill=white] (0,0) circle;
    \path[fill=red] (0,0) -- (2,0)
      arc [start angle=0, end angle=30];
  \end{scope}
  \begin{scope}[xshift=5cm]
    \path[draw=black,fill=white] (0,0) circle;
    \path[fill=red] (0,0) -- (2,0)
      arc [start angle=0, end angle=70];
  \end{scope}
  \begin{scope}[xshift=10cm]
    \path[draw=black,fill=white] (0,0) circle;

```
Poster Tutorial #11

Finally, the `contact` box is filled. But, in our example case, there is not much space for a lot of contact text. Therefore, we add `fit` to fit in the text automatically.

Process

```
%...
\posterbox[adjusted title=Contact,fit,fit basedim=12pt]
    {name=contact,column*=4,span=1.5,between=process and bottom}{
  \lipsum[2]
}
%...
```

Our poster is finished now. Just go to the next page to see the final result.
